# IN HUB MARKETS

Quotations on Leading Products In Demand

Boston, March 9.-There is an easy market for butter, with receipts increasing slowly. The jobbing quotations are: Choice northern creamery, 31@32c; western creamery, 30@31c.

Cheese is in moderate demand, but as the supply is small prices are very firmly held. York state, 15 1-26/16 1-2c. Vermont, 14 1-26/15 1-2c.

Eggs have been in light supply and prices have stiffened up a little, partly on this account and partly owing to the fact that New York was higher. Choice hennery and nearby, 276128c; eastern extras, 26/a27c; western, 25/a26c. The local fruit and vegetable mar-

ket is gradually working toward a spring basis, both in prices and trading. Garden truck from the south has been a little scarce because of the cold weather in that section of the country. but the market is well stocked with products from local greenhouses. Local dealers are not receiving many straw berries, but larger shipments are expected as soon as warm weather strikethe south.

The movement of apples has been very slow and they are somewhat weaker. There are lots of apples that sell at \$1.5062.25, but strictly fancy fruit is not plenty and is high; retailers prefer to pay high prices and get good fruit rather than take the average offerings at low prices.

Receipts of potatoes have not been heavy, but they have been sufficient for the demand, and prices have been rather easy. The Maine producing sections are said to be prefty well cleaned up Prices at shipping points are firm and it is not unlikely that local quotations will work up. The receipts of green string beans have increased a fittle and the price has gone down; wax beans however, remain scarce and high. New southern cabbages have begun to come forward freely. They are large and look good, but are soft. For that reason and because old native stock is plenty the new cabbages are cheap. They usually start the season at about \$2.50 ; the town. They are both faithful crate, but now they sell at \$1,25071.50.

There is a fair supply of celery from Florida and California, but not much native stuff. Cucumbers are tending downward, because the supply exceeds the demand. Kale and spinach from the south have been scarce, but hothouse dandelions and beet greens have been coming along well. Lettuce is firmer; the receipts have been smaller and there has been a big demand from outside markets.
